

Graphing Stories Homework

Choose the graph that best represents each situation.

1. A tomato plant grows taller at a steady pace. _____
2. A tomato plant grows quickly at first, remains a constant height during a dry spell, then grows at a steady pace. _____
3. A tomato plant grows at a slow pace, then grows rapidly with more sun and water. _____
4. Lora has \$15 to spend on movie rentals for the week. Each rental costs \$3. Sketch a graph to show how much money she might spend on movies in a week. Tell whether the graph is continuous or discrete. _____

Use the graph at the right.

5. The graph shows the amount of rainfall during one storm. What does segment *d* represent?

6. Which segment represents the heaviest rainfall?

For each situation, tell whether a graph of the situation would be a continuous graph or a discrete graph.

7. the number of cans collected for recycling _____
8. pouring a glass of milk _____
9. the distance a car travels from a garage _____

There is a back!

10. **Explain the Error** A student is told to draw a graph of the situation which represents the height of a skydiver with respect to time. He drew the following graph. Explain the student's error and draw the correct graph.

Spiral Review

11. Solve and graph $\frac{1}{4}x + 60 \geq 51$ 

12. Solve $8(x + 4) - (x - 1) = 5x + 33 + 2x$
